2010 - 2013

- BCA-The course covers the basics of computer science and software development, as well as various computer languages and web technologies.

Language

English

Malayalam

Japanese

Hindi

Skills

C#, ASP.NET

MS SQL

ORACLE

JAVASCRIPT, jQuery

Outside of work

- I have N3 level of Japanese Communication.
- Certified AWS cloud practitioner.
- Higher Secondary from Board of Higher Secondary Education, Kerala, India.

Selected relevant project experience

Cognizant KK Japan Tokyo, Japan

Waterfall

Project 1:

Is a pharmaceutical commercial application which holds Sales & Marketing data of Japan. This application contains many KPI reports which helps to provide better insights, analysis and fact-based decision making to increase Commercial effectiveness. This will be implemented through a single, global data warehouse providing one version of the truth consistently from Executives to the Sales representatives.

Project 2:

is an application supports wholesalers to apply for the rebates and then calculates the value of rebates they are eligible. It loads the source data such as ex-wholesaler sales transaction data, customer profile information via application. Based on the input configurations for rebate calculations and raw data loaded through system, it creates the data marts and calculates the rebate amounts, The calculated rebate values are interfaced to other systems for further processing.

Cognizant KK Japan Tokyo, Japan

Waterfall

Project 3:

This is a system for inputting and registering information into the system and printing consent forms. In addition, payment information for downstream systems is output as a file based on the input information. Information on these payments between interested parties should be disclosed based on transparency guidelines in the industry arrangements.
